

Etsy Listing Package — The Ultimate Biohacker Operating System™

Built from live market research of bestselling listings in the GLP-1 tracker, menopause/HRT tracker, supplement tracker, GoodNotes planner, Notion "Life OS," and biohacking planner niches (July 2026). Key insight: **no bestseller currently bundles GLP-1 + menopause/HRT + biohacking in one system — this combination is open white space.**

1 • SEO Titles (each ≤140 characters — Etsy's limit; primary keyword in the first 40)

Primary listing (recommended — GLP-1 has the highest search volume + momentum):

*GLP-1 Weight Loss Tracker & Wellness Planner Web App | Menopause HRT Symptom Log, Supplement & Lab Tracker
| Biohacker OS + Printables*

Second listing (menopause keyword cluster — publish as a separate listing of the same product):

*Menopause & Perimenopause Symptom Tracker + GLP-1 Weight Loss Journal | All-in-One Wellness OS Web App &
Printable Planner | HRT Tracker*

Third listing (premium/brand positioning):

*Ultimate Biohacker OS | Wellness Tracker Web App + Printable Planner Bundle | GLP-1, HRT Menopause,
Supplement, Lab & Recovery Tracking*

Strategy note: bestsellers own multiple keyword verticals by publishing 2–3 listings for the same product, each clustered to one niche. Do the same.

2 • The 13 Tags (all ≤20 characters — Etsy's tag limit)

For the primary (GLP-1-led) listing:

1. `glp 1 tracker`
2. `glp1 weight loss`
3. `semaglutide tracker`
4. `tirzepatide journal`
5. `injection tracker`
6. `weight loss journal`
7. `menopause tracker`

8. [hrt tracker](#)
9. [supplement tracker](#)
10. [symptom tracker](#)
11. [wellness planner](#)
12. [biohacking planner](#)
13. [health planner women](#)

Rotate onto the menopause-led listing: [perimenopause log](#) , [hormone tracker](#) , [longevity tracker](#) , [lab results tracker](#) , [self care planner](#) , [life os template](#) , [medication tracker](#) .

(Avoid third-party drug brand names — "ozempic tracker" etc. — in tags/titles unless you accept trademark risk; competitors that use them lean on the non-affiliation disclaimer below.)

3 • Listing Description

✨ **THE ULTIMATE BIOHACKER OPERATING SYSTEM™** ✨ *The last wellness tracker you'll ever need — made for women who are done juggling six apps and a drawer full of half-used planners.*

If you're navigating a GLP-1 journey, perimenopause, HRT, a supplement cabinet that keeps growing, and a red-light panel in the corner of your bedroom... this was made specifically for you. One private, beautiful home for all of it — designed like a luxury planner, powered like an app.

WHAT'S INCLUDED

The Web App (works on iPhone, iPad, Android & desktop — installable like a real app) • Today dashboard with your Biohacker Score™, protocol checklist & gentle trends • Peptide & injectable tracker — 37-entry library (semaglutide, tirzepatide, BPC-157, NAD+ & more) + unlimited custom entries, site-rotation map, vial & refill reminders, travel cards • Reconstitution Studio — mg/mL math with a visual 100-unit syringe (arithmetic only, never dosing advice) • Hormones & Menopause suite — HRT log (creams, patches, pellets, troches & more), 20-symptom daily check-in, trend charts to bring to your provider, "ask my provider" list • Supplement Sanctuary — 90+ item library, 25 categories, 48 seed brands, barcode scanning, morning/afternoon/evening/bedtime stacks, inventory & reorder reminders, CSV import/export • Biohacking tools — red light, cold plunge, sauna, HRV, CGM, breathwork, PEMF + 20 more • Labs & Biomarker Binder with marker-by-marker trend lines • 8 daily ritual trackers: nutrition, body, fitness, sleep, beauty, dental, hair, mindset • Household profiles (spouse, kids, parents) + full pet wellness binder 🐾 • Light & dark luxury themes • 100% private, local-first data • works offline

The Printable Companion Binder (print at home, unlimited) • 15 matching pages: weekly dashboard, medication card, peptide log, HRT tracker, symptom tracker, supplement schedule, lab binder, provider questions, red light / cold plunge / sauna logs, pet binder, monthly review, quarterly optimization review + cover page • Print blank — or pre-filled with your own data (that's the magic ✨) • Save as PDF → import into GoodNotes or Notability for stylus-friendly digital planning

HOW IT WORKS

FAQ

Is this a subscription? No. One-time purchase. *Do I need an app store?* No — it installs straight from your browser (Add to Home Screen). *Is my data private?* Completely. Your entries live on your own device; nothing is sent to us. *Does it tell me doses?* Never. Every dose field says "per your provider/label." The reconstitution studio does arithmetic only. *Can I track my*

husband / mom / dog? Yes — household profiles and pet profiles are built in. *Refunds?* Due to the instant-download nature of digital products, all sales are final — but message us with any issue and we'll make it right.

12 · Pricing Strategy (from comps research)

- Anchor: **\$127 compare-at** → **sell \$97** (permanent strike-through sale — the category norm).
- Justify premium with: app + printables hybrid, lifetime access, module count, "bonus stacking" (the printable binder IS the bonus — say so).
- Optional: a **\$17–27 "printables-only lite" listing** as a traffic/review engine that upsells to the full OS.
- Expect: simple PDF competitors at \$2–8 — never compete on their turf; sell the *system*.
